

**Good at Math?**  
**Want to step up to  
the challenge?**

The American Institute of Mathematics presents

# MATHCOUNTS

**for Martin Murphy's 7th and 8th Graders**

**Meetings will be on Mondays**  
From 3:05 – 4:05pm in room 26  
*Starting on September 11*

This program really focuses on problem solving. Students are encouraged to do their best, push their limits and excel! You can look forward to an exciting season of exploring problem solving strategies with a talented group of awesome math students. I'm hoping to challenge those kids looking for challenges and intrigue those who are here just because they enjoy solving math puzzles, like me!

*Our program is free of charge, and all that is required is a love of math and desire to learn!*

If you wish to enroll your student in the 2017 MATHCOUNTS program, please complete a MATHCOUNTS registration form on our website at [www.morganhillmath.org/academics](http://www.morganhillmath.org/academics).
