Dear Parent or Guardian,

The Healthy Schools Act of 2000 requires that all schools provide parents or guardians of students with annual written notification of expected pesticide use on school sites. This letter and its attachments serve as you annual notification.

During the school year it may be necessary to apply pesticides at your child's school to avoid serious health problems posed by pests or to maintain the integrity of school buildings and grounds. Below is a list of products and their active ingredients and information concerning the use of the product that we may need to use at your school site during the 2017 through 2018 school year.

It is the goal of our School District to provide the safest and lowest risk approach to control pest problems while protecting students, staff, and the environment. A full range of alternatives will be considered giving preference to non-chemical methods. You can find out more information on pesticides and their alternatives at the California Department of Pesticide Regulations website: www.cdpr.ca.gov.

The following is a list of the anticipated or expected pesticides and herbicides to be used at various school sites. Parents or guardians may request prior notification of individual pesticide applications at the school site.

Also, a complete MSDS (Material Safety Data Sheet) containing all active ingredients for each chemical used, may be obtained from the Morgan Hill Unified School District by contacting Anessa Espinosa, Director of Facilities at (408) 201-6085 or contacting the website: www.pesticideninfor.org.

Product Name	Primary Active Ingredient	Expected Usage (Purpose & Amount)
